The following table represents the ASCII characters used for typing the Pashto texts included in the Frequency Tables. The same characters were also used to type the initial dictionary drafts in WordPerfect; the computer key, *b*, is typed for the Pashto letter ب, which sounds like *b* in English. The Frequency Tables were laser-printed from the University of Pennsylvania's mainframe computer; the Pashto letter ژ, which was typed as ^ (found above the number **6** on many computer keyboards) is printed as ¬ on the mainframe's laser printer used for Frequency List I and II.

Annotation of a Frequency List

The following section of a frequency list was selected to illustrate the lexical information supplied by the lists and its use in the dictionary sample of this report. With annotation of the kind shown below, the frequency lists can provide an abundance of orthographic, grammatical and lexical detail while also serving as a list of typing errors to be corrected. Unfortunately, there were neither funds nor qualified staff available to do this detailed annotation systematically and completely for both frequency volumes; instead, the frequency volumes were referred to primarily for checking the textual use of particular items of lexicon and for comparing the frequencies of variant spellings. The frequency files are available in computer format for other users; they provide a source of information unmatched in South Asia for textual studies on topics in orthography, morphology and lexicon as well as other linguistic topics such as dialect and syntax. Beyond that, the frequency lists and source texts can be used for literary and social science studies, providing not only a solid grounding for research in Pashto literature and culture but also a basis for comparative studies with other parts of South Asia.

The pages below are derived from pages 26 to 31 of Frequency List I beginning with the letter *p*. To save space here, a maximum of four references are included. The words listed in the third column below are in the first column of the frequency lists; they represent the words as typed from the texts. The abbreviations appearing in the second column indicate the relation of third column to the first column.

As already stated in this report, only a subset of the texts were corrected for typing errors. These typing errors included not only errors in the texts themselves but also errors in page numbers. Several examples of page number errors can be seen in the frequency lists below, such as <F309:74>01 for the entry p'm; this resulted from a spacing error, and does not affect the related frequencies. Sometimes page numbers were omitted, in which case the SAS program assigned numbers in such a way that the page number was not changed until a new page number was found. It is therefore suggested that users check the pages following a text word reference if the word is not found on the reference page given in the Frequency Lists.

Any typing error will obviously affect the frequency of a particular word. When components of the references are identified, as with p' below, the frequencies can be reassigned; thus instead of a p' frequency of 5, as in Frequency Volume I, the total number is divided between misprints, typing errors, and further occurrences to be checked. This has been done in the list below by putting the typing errors and the misprint on separate lines. No attempt, however, was made in the annotation here to increase the frequency of y' (یا) or p'sydw (پاسیدو) as an adjustment for these errors, since the actual correcting of the text itself has not yet been done. Similarly for p'ny below, the two identified references are moved to a separate line; the total occurrences in the original frequency list (5 in Vol. I) are reduced by the number of words identified in the following line. Although it is quite likely that the remaining three occurrences of p'ny are also a part of the compound p'ny pt, column 2 is still marked by [, indicating that the remaining references have yet to be checked.

The varying orthographies for Pashto have also led to some typing errors. For example, p'plyn was typed with a traditional Pakistani orthography rather than with the text's actual

p'plen (پاپلېن), which is unusual Pakistani orthography for the English word, "poplin." The typist's "correction" is treated here as a typing error in column 2 below; it is, however, the form used as a headword. The form p'plyn (پاپلين) is also marked as a headword form, despite the fact that پاپلېن is given in the dictionary, because this annotation does not distinguish orthographic variations that were standard prior to the Bara Guli conference of 1990. The spelling p'nRh (پانړه) is thus similiary considered a headword form, although the orthography now agreed upon at Bara Guli and used in this dictionary is p'Nh (پانه).

Abbreviations used in Annotation of the Frequency List

M	Misprint; probable correct word is given in first column.
T	Typographical error in text; first column is correct form.
[	Not yet checked; first column is the third column equivalent in Pashto script.
<	An inflected form of the headword; first column is the headword form.
=	Text word is a headword; the orthography may differ from that of the first column.
Tr	Typographical error in a reference; first column is correct number if known.
C	Compound or phrase whose definition is given in the entry for the headword of the first column.
PN	Proper name not included in dictionary.
1	First headword with this spelling.
2	Second headword with this spelling.
X	At least one of the numbers in the column immediately above should be decreased.

[1] As already explained in Part II: 1-2, only a limited number of references are given for each category. It is probable that these 5 references, like the following two, are also to someone named Paul, but these references have not yet been located and checked.

[2] The two references given on this line are both to someone named Paul; personal names are not usually included in this dictionary.

Frequency List Codes and Sources[1]

Codes beginning with PA are adult literacy booklets published by the Pashto Academy (Peshawar). The subject matter of these booklets includes basic science, folk stories and children's games, crafts and food preparation, descriptions of the various provinces of Pakistan, history, economics and banking, and biographies of both secular and religious figures. Most of the topics were selected by the national government; similar booklets in other languages of Pakistan will offer convenient comparative material.

Classical Poetry[1]

The four PX files were typed for Prof. D.N. MacKenzie using a somewhat different transliteration system. The consonants have been converted to the system used for this project; the vowels, however, are in some cases different. The identification number has PX (Poetry of خټکشحال خان ښټک) followed by the page number on which the first couplet of that *yazal* appears. The number following the semi-colon is the number of the غزل starting on that page (e.g., PA371:2 is the second غزل starting on page 371).

PXG300	32,161	ارمغان خوشحال	edited by	میان سید رسول رسا
			University Book Agency, Peshawar. 1952	
PXG400	34,035			
PXG500	35,596			
PXG600	26,333			

(Total words = 128,125.)

The RB file has identification of page, poem, and line numbers; the poems are in an alphabetic sequence (e.g., RB069e:15 is page 69, line 15 and RB070e:02 is page 70, line 02; e indicates that both lines are from the same poem).

RB	66,688	دیوان د عبد الرحمن	edited by	میاں صاحب سیّد رسول رسا
			University Book Agency, Peshawar (n.d.)	

The HB and AX files have identification by page and line number (e.g., HB015:6 is page 15, line 6 of Hamid Baba's poetry).

HB	47,001	در او مرجان دیوان عبدالحمید	edited by	سید انوار الحق جیلالی
		University Book Agency,	Peshawar, n.d. (forward: 1978)	
AX	32,914	دیوان علی خان	preface by	حبیب الله رجیع
			ادمی خدمت by	قاسم بنوی

Total words of classical poetry is 274,728.

Second frequency list[2]

Except for FSM, FVJC, and F333, these texts are translated in *The Bazaar of the Storytellers* by W. L. Heston and Mumtaz Nasir (Islamabad: Lok Virsa, 1988). Most of them are based on chapbooks which have no publication date but which were purchased prior to 1985. For the translated texts, the lines sung on the tapes (rather than the lines in the chapbooks) were used as text inputs. Many of these chapbooks have been reprinted; to aid in identification, the first and last lines of the text inputs are included below; the respective chapbook page numbers are given below in parentheses when there has been a fairly close match of tape and text.

Part III: Dictionary Introduction and Grammatical Sketch

The Entries

Pashto-English

Each entry begins with a headword in boldface Pashto type. If there is a difference between 'standard' Pakistani and Afghan orthography, this will be indicated by $^{\pi}$ or $^{\alpha}$ respectively; the alphabet and variations in orthography as used in this dictionary are discussed in the following section. If two or more headwords are identical in spelling but have meanings and etymologies with little in common, they are given superscript numbers to distinguish the entries. If an adjective or noun has a related feminine form, this follows the masculine form and is given in brackets (f. . . .). Variant spellings with a short definition are given separate entries unless their alphabetical order would be separated by only a few entries; these variant spellings are referred back to the main entry which will have fuller grammatical information, definitions and examples.

The pronunciation is given in a phonemic transcription following the headword; related feminine forms may be included here. Usually only a standard pronunciation is given; variants may be included at the end of the entry. No attempt is made to indicate all dialect variants. An explanation of the transcription used in this dictionary is given in the **Pashto Alphabet** section below.

The part of speech follows the headword except when this is simply an alternate spelling. Nine part of speech categories are used: noun, adjective, adverb, pronoun, preposition, postposition, verb, conjunction, particle, numeral and interjection. Prefixes, suffixes, phrases, combined forms and abbreviations are identified as such.

If the part of speech is a verb (v.), its headword form is the infinitive unless otherwise stated. It is usually followed by the Present I (Durative) and the Past II (Perfective) forms and a first person singular pronoun in parentheses. In general, verb stems are not listed separately unless they are 'irregular' (see **Grammar Guide: Verbs**).

If the part of speech is a noun (n.), it is identified as to gender (masculine (m.) or feminine (f.)); it is in the direct singular case unless otherwise stated; the direct plural, oblique singular, and oblique plural forms are then given in parentheses.

If the part of speech is an adjective (adj.), it is in the direct masculine singular unless otherwise stated. The inflections given in parentheses are the direct plural (which is the same as the oblique singular), the feminine direct plural (within a second set of parentheses) and the oblique plural (which is the same for both masculine and feminine).

When a word is used as more than one part of speech, both are included. When it is an adjective functioning also as a noun (e.g., someone or something with the qualities indicated by the adjective), usually only one or two of these qualities will be repeated; the remainder can be inferred.

The part of speech and inflections are followed by definitions of the headword and by phrases using the headword. When definitions differ between Afghanistan and Pakistan, they are preceded by $^{\alpha}$ and $^{\pi}$ respectively. When illustrations are given in Pashto script and the 'Pakistani' or 'Afghan' orthography would differ for one or more words, a single orthography

is used for the entire illustration; the illustration then has ^{n} or $^{\alpha}$ at the beginning.

The definitions and illustrations may be followed by remarks about usage, dialect, and etymologies; etymologies for borrowed words should be understood to indicate a source, not the path of borrowing.1

English–Pashto

Nouns are cited in the nominative singular unless otherwise noted; regularly formed parallel feminine forms (پاکټره "woman doctor") are not cited. Adjectives are quoted in the masculine singular; this includes participles, for which Afghan (and optional Pakistani) orthography is used (e.g., کوونکی). Pairs of transitive and intransitive verbs are included in the entry for the transitive form in English; thus ماتېدل 'to be broken' is included in the entry **break**. In some cases, a verb that is intransitive in English will be transitive in Pashto (e.g., "bicker" in English and جګړه کول in Pashto); in cases of doubt, the Pashto to English entries can be consulted.

For borrowed words, the English to Pashto entries generally cite the original Arabic or Persian form (e.g., معلوم rather than مالوم, اقرار rather than اکرار); however, a Pashto orthography and pronunciation with a facultative *-y-* is given for Arabic words with a sequence of two vowels (e.g., دایم *dāyim* rather than دائم *dā-im*). The pronunciations of borrowed words omit the facultative ^{a} (e.g., *zahr* rather than *zah^{a}r*). For Pashto words, the statistically most frequent forms are given (e.g., هوښیار rather than اوښیار or هښیار) for common words with high frequencies. Several conventions were adopted, however, to avoid constant checking; for example, in pairs of words with *u-* and *wə-* (e.g., اوچ and وچ), the latter is generally used.

---

[1] Thus words cited as, for example, derived from Arabic may in fact have entered Pashto via Persian or Urdu, rather than directly from Arabic.

Pashto Alphabet: Orthography and Pronunciation

The Pashto alphabet is given below in the order in which it used for this dictionary. In general, entries follow the practices unanimously approved on July 12, 1990, by the Symposium on the Pashto Script held at Bara Gali, N.W.F.P. As indicated below, the conference recommendations resulted in only one difference between the script to be used in Pakistan and Afghanistan. Previous practices are noted below; they will undoubtedly persist for some time. A variant Pashto alphabet devised by Qalandar Mohmand for use in a Pashto-Pashto dictionary project financed by the NWFP provincial government differs only slightly from the system recommended at the Bara Gali conference.[1] The second column of the table below gives a transliteration; consonants which are specific to Pashto and subject to major dialect variation are marked with an overbar and reflect 'hard' dialect pronunciation. The third column gives the name of the letter in Pashto and the fourth column the normal phonemic transcription.

[1] The system of Qalandar Mohmand (QM) differs from the Bara Gali recommendations only in that a final *-a* is written ـه but a final *-ə* is represented by ۀ.

[2] In initial position ا may represent *a*, *i*, or *u*, and with following ي ی و also *o* or *u*, *i* and *e* respectively. The Bara Gali Symposium endorsed the view that *ā* does not occur initially in Pashto words. It does, however, occur in borrowings, written either traditionally آ (*alif mamduda*) or simply ا The former, transcribed *ā*, is taken as the primary form in this dictionary.

[3] This is an 'elegant phoneme', only realized by some speakers, as a glottal stop, in formal speech. Normally it is omitted. If the preceding vowel is *a*, this is lengthened to *ā*, e.g. معلوم *ma'lum* becoming *mālum*. The sequence *u'* in assimilated borrowings is pronounced as *o*, e.g. شروع *šuru'* becoming *šuro*.

ړ	ṛ	ṛe	ṛ	ڼ	n̥[1]	nuṇ	ṇ
ز	z	ze	z	و	w	wāw	w
ژ	ž	že	ž	ه	h	he	h
ږ	ḡ	ḡe	ḡ	ی	y	ye	y

The last two letters, *h* and *y*, have additional forms in word-final position to represent the vowels and diphthongs *a, ə, e, i, ay, əy*. The following table gives the forms recommended by the Bara Gali conference beside other forms common in Pakistan and Afghanistan in recent years.

Bara Guli	Pakistan	Afghanistan		
Final position				
ې	ی	ی	*-i*	
ې	ے	ې	*-e*	
ئ	ئ	ئ	*-əy*	verbal ending 2nd pl.
ئ	ئ	ی	*-əy*	fem. noun and adj. ending
ی	ے	ی	*-ay*	
Non-final				
ـِـ	ـِـ	ـِـ	*-i-*, *-ay-*	
ـُـ	ـِـ	ـُـ	*-e-*	

Other vowel markings:

ـَ	*a*
ـِ	*i*[2]
؍	*u*
ـٙ	*ə*

The phonemic transcription given after the headword is independent of the written form. It thus makes no distinction between (Arabic) letters pronounced alike, such as ت and ط *t*, nor between the writing of the vowels *i, u* with or without the letters ي ، و respectively.

The maximum phonemic inventory of Pashto comprises the 7 vowels *a, ə, ā, e, i, o, u* (also forming the 7 diphthongs *ay, aw, əy, āy, āw, oy, uy*) and the 30 consonants and semi-vowels:

b č d ḍ f g ḡ γ h ǰ k l m n ṇ p q r s š š t ṭ w x x̄ y z ž ž

The realizations of those which differ from normal English are as follows:

a is a short low back vowel like the *u* in 'b*u*t'. When unstressed it often approaches or coincides with *ə*. In words ending in a group of two or more consonants many speakers insert a short non-phonemic vowel between the consonants when they occur in final position or

---

[1] This letter was traditionally written with the digraph نړ

[2] In several particles, final *e* was also written traditionally only with ـِ, as دِ *de*, کښِ *kx̄e*.

before another consonant. This vowel may be written as a raised ^{a}, to distinguish it from the phonemic *a*. E.g. *garm, kəšr, uḡd*, pronounced *gár^{a}m, kóš^{a}r, úg^{a}d*, but with the fem. ending *gárma, kóšra, uḡdá*.

ə is a short central vowel like the *a* in '*a*go, sof*a*'. When stressed this sound is always a distinct phoneme from *a*. Unstressed, however, it is often more convenient to regard it as an allophone, a variant pronunciation of the phoneme *a*. Nevertheless, all Pashto orthographies, including that of the Bara Gali conference, confuse phonetic and phonemic spelling and write both stressed final *-ə́* and unstressed *-ə* (phonemically *-a*) identically. An apparent *-ə* is thus often to be regarded as representing the phoneme *a*, e.g. ښځه *x̌óža*.

ā is a long low back vowel like the *a* in 'b*a*rge, f*a*ther'; in some dialects it is more rounded, like *'awe'*.

e is a mid-high front vowel like the *ê* in 'f*ê*te'. Cf. *ay*.

i when stressed is a half-long high front vowel like *i* in 'l*i*ter'; unstressed it is shorter, as in 'b*i*t'.

o is a mid-high back vowel, as in 'r*o*se, b*oa*t'; before *r* it is lower, as in 'f*o*re'.

u when stressed is a half-long high back vowel like *oo* in 'b*oo*t'; unstressed it is shorter, as in 'c*oo*k'.

ay is pronounced as in 'p*ay*' in Afghanistan. In Pakistan it is generally realized as a mid-low front vowel *è* as in French 'p*è*re', or *ei* in 'h*ei*r, th*ei*rs'.

əy, in Afghanistan a sequence of *ə́* and *i*, is pronounced almost like *y* in 'sk*y*' in Pakistan.

āy is like *i* in 'h*i*gh'. In Pakistan the *y* of the diphthongs *āy, oy, uy* is pronounced *e* rather than *i* (and accordingly often so written); this remains a realization of the phoneme *y*, nevertheless.

āw is like *ow* in '*ow*'. In Pakistan the *w* is here pronounced rather as *o* than *u*; cf. *āy*.

oy is higher than the English 'j*oy*'; it is nearer to 'J*oey*'. On the *y*, see *āy*.

uy is like 'gl*uey*'. On the *y*, see *āy*.

č : *ch* in '*ch*eat'.

d and *ḍ* are a contrasting dental and retroflex pair. *d* is like French or Italian *d*. For *ḍ* the tongue is curled upwards to touch the hard palate; English *d* is heard by Pashto-speakers as their *d*.

f is an 'elegant phoneme', often realized as *p*. E.g. Arabic *faṯḥ* becomes *páṯa*.

ğ is pronounced as a retroflex *ʒ́* (see *ž*) in southern dialects. In northern dialects it coincides with *g*, as in 'goat'.

γ has no English equivalent. It is the voiced counterpart of *x* (q.v.). It is similar to the French '*r grasséyé*'.

h is often omitted in speech, thus هلك *halšk* or *alšk* 'boy', ممدوح *mamdú(h)* 'praised'. As the second of two final consonants in Arabic words, such as وجه *wajh*, صلح *sulh*, it is realized as the vowel *a*, thus *wája*, *súla*. In the sequence *oh* in final position the *h* is realized rather as *y* in Pakistan (i.e. as the diphthong *oy*, q.v.).

ǰ : *j* as in '*j*am'.

ṇ has no English equivalent. It is a nasalized *ṛ* (q.v.) and cannot occur at the beginning of a word.

q is an 'elegant phoneme', usually pronounced the same as *k*. Speakers of Dari Persian may realize it as a uvular *q*.

s̄ is pronounced as *ts*, as in 'ca*ts*', in Afghanistan. In Pakistan it generally loses the *t* to coincide with *s*.

š : *sh* as in '*sh*e'.

t and *ṭ* are a contrastive dental and retroflex pair. *t* is like French or Italian *t*. For *ṭ* the tongue is curled upwards to touch the hard palate; English *t* is heard by Pashto-speakers as their *ṭ*.

x is like *ch* in Scottish 'lo*ch*' or German 'Ba*ch*'.

x̄ is pronounced as a retroflex *ʃ́* (see *š*) in southern dialects. In northern dialects it coincides with *x*, as in 'Ba*ch*'.

z̄ is pronounced as *dz*, as in 'a*dz*e', in Afghanistan. In Pakistan it generally loses the *d* to coincide with *z*.

ž : *g* in 'rouge' (as in French), or *s* in 'plea*s*ure'. In some eastern dialects in Pakistan it coincides with *ǰ* as in '*j*am'.

Stress: In the Pashto-English dictionary entries, Pashto words are divided into syllables; primary stress is indicated by a short vertical stroke (ˈ) preceding the stressed syllable. In the **Grammar Guide**, stress is indicated by an accent mark (´) over the vowel of the stressed syllable.

[1] An ending added to the headword is indicated, for example, *~ūna* (e.g., *kitābūna*). It should be noted that there may be changes in stress, as from the final syllable (*ki-tāb*) to the penultimate syllable (*ki-tā-bū-na*), and similarly in the oblique plural (*ki-tā-bū-no*), which are not indicated. Other illustrations can be found in the **Grammar Guide** below.

[2] This is used, for example, with هغه, where the dir. pl. is the same as the obl. sing. (*ma-ne*; =, *ma-no*).

[3] When referring to scripts, the superscripts α and π represent the Bara Guli conventions current for Afghanistan and Pakistan, respectively; when used for pronunciation, they roughly represent eastern dialects of the Jalalabad-Kabul area in Afghanistan and the Yusufzai dialect in Pakistan, respectively, both of which are "hard" dialects.

GRAMMAR GUIDE

This guide is intended only to provide a sketch of the main morphological patterns occurring in Pashto. It makes no pretensions of being a comprehensive grammar. The actual forms attested for different words will be found in the dictionary. Stress is here marked by an accent mark over the vowel and a hyphen is used to indicate an added inflection (rather than a syllable division).

I. Nouns

Nouns are of two genders, either masculine (masc.) or feminine (fem.); they are inflected for number, singular (sing.) or plural (pl.), and for case, direct (dir.), oblique (obl.). pre- or postpositional (prep.) or vocative (voc.). In the dictionary only the direct and oblique case forms are normally listed.

A. The direct case is used for the subject of the sentence and for the direct object of the verb's action.

سړی (سړے) ښځه ويني *saṛay ẋəža wini* The man (subject) sees the woman (object).

B. The oblique case is used for:

1) the agent of a transitive verb in the past tense:

سړي ښځه وليده (ولیدله) *saṛi ẋəža wəlida (wəlidəla)* The man (agent) saw the woman.

2) the object of most prepositions, including *da* 'of', *pa* 'in, at, etc.', and the postpositions *na, ta, šəxa, lara, pore, sara*, or "ambiposition" combinations of a pre- and postposition, e.g. *la ... na* 'from':

د بړې بازدرې *da bare bāzdáre* of Upper Bazdara

له دروازې نه *la darwā́ze na* from the door

C. The prepositional case, however, is normally used for the object of the prepositions *be* 'without', *la* (or *ḍa*) 'from' and *tar* 'to' with all nouns, and of *pa (... kẋe)* 'in' with feminine nouns:

له کوره *la kóra* from the house

تر لاسه *tar lā́sa* to (the) hand

په مڼه کښې *pa maṇá kẋe* in the apple

Adjectives qualifying a noun in the prepositional case may either be also in the same case,

له مشره وروره *la məšra wrora* from (his) elder brother

or in the oblique case,

له پردي زويه *la pradi zoya* (rather) than a strange(r) son

D. The vocative case is used for direct address:

غله *γála* Thief!

هلکه *halśka* Boy!

Declensions: In the following declensions (classes of nouns), the Oblique case forms in both Singular and Plural are most often distinct from the Direct case forms. With most Masculine Singular nouns, the Prepositional and Vocative case forms are identical but are distinct from both the Direct and Oblique case forms. With most Feminine Singular nouns, the Prepositional and Vocative case forms are identical with the Direct case forms. With all Plural nouns, Masculine and Feminine, the Oblique, Prepositional and Vocative forms are identical and are distinct from the Direct case forms. According to the distribution of case forms, all Pashto nouns fall into one (or more) of five declensions. Loanwords (borrowings) from Arabic, and Pashto words treated as

pseudo-Arabic, may follow a sixth, mixed Arabic and Pashto declension. Several nouns, being the names of composite or collective things such as 'water', 'wheat', are only plural and inflect only for the oblique cases, e.g. Masc.pl. غنم *γanám*, obl. غنمو *γanámo* 'wheat'; Fem.pl. اوربشې *orbáše*, obl. اوربشو *orbášo* 'barley'.

[1] The feminines of nouns of this type follow the First Declension (Le): *pəxtaná*, pl. *pəxtané* 'Pashtun' (fem.).

Sixth, mixed Declension:

(VIa) Masculine nouns of Arabic origin.

Dir.	مجاهد	*muǰāhíd*	مجاهدين	*muǰāhidín*	fighter
Obl.	"	"	مجاهدو ، مجاهدينو	*muǰāhidíno, muǰāhído*

(VIb) Masculine nouns (chiefly) of Arabic origin, taking the Arabic fem. pl. ending *-āt*.

Dir.	موضوع	*mawzó*	موضوعات	*mawzowā́t*	topic
Obl.	"	"	موضوعاتو	*mawzowā́to*	
Prep./Voc.	"	"	"	"	

Several of these forms occur only as collective plurals, e.g. *āyidā́t* 'earnings', *maqāmā́t* 'authorities', *muqarrarā́t* 'regulations'. Rarely Pashto (and Persian) words are also so declined, e.g. *žangalā́t* 'forests'.

(VIc) Arabic "broken" plurals.

Dir.	طرف	*taráf*	اطراف	*atrā́f*	direction
Obl.	"	"	اطرافو	*atrā́fo*	
Prep./Voc.	طرفه	*taráf-a*	"	"	

Some nouns of this class may further take a Pashto pl. ending, e.g. *abyā́t* or *abyātúna* 'verses', *uṣúl* or *uṣulúna* 'principles'.

Kinship Terms: Kinship terms very frequently have irregular plurals:

Dir.	وړور	*wror*	وړونه	*wrúṇa*	brother
Obl.	"	"	وړونو	*wrúṇo*	
Prep./Voc.	وړوره	*wrór-a*	"	"

Dir.	مور	*mor*	مېندې	*máynde*	mother
Obl.	"	"	مېندو	*máyndo*	
Prep./Voc.	مورې	*móre*	"	"	

Similarly *lur*, pl. ^{n}*lúṇa*, $^{\alpha}$*luṇe* 'daughter', *xor*, pl. *xwáynde* 'sister'.

In Pakistan there is a tendency for the irregular plural forms to be abandoned in favour of more regular endings, the nouns thus being transferred to the First declension, Masc. Ic. and Fem. Ig. respectively, thus: *wror*, pl. *wrorā́n* (even *wroryā́n*), *lur*, pl. *lur(y)ā́ne*, *mor*, pl. *mor(y)ā́ne*, etc.

II: Adjectives

Adjectives may appear in a noun phrase, where they usually precede the qualified noun, or they may appear alone in a predicate. In both cases they are inflected to agree in number, case and gender with the nouns to which they refer or which they qualify.

Adjectives fall into one of six classes, the first five of which closely parallel the noun classes. When an adjective is used as a noun, it is declined according to the corresponding noun class. With the exception sometimes of the second declension, the oblique plurals of both the masculine and feminine forms are the same. Furthermore, for all classes the oblique singular and the direct plural forms are the same.

First Declension: Adjectives ending in a consonant:

	Masc.		Fem.		
	Sing.	Pl.	Sing.	Pl.	
Dir.	سم	سم	سمه	سمې	straight
	sam	*sam*	*sáma*	*sáme*	
Obl.	سم	سمو	سمې	سمو

Prep./Voc	سمه	سمو	سمې	سمو	
	sáma	*sámo*	*sáme*	*sámo*	

Adjectives of this class take the "animate plural" endings Masc. *-ān*, Fem. *-āne* (cf. Noun declensions La, g) when qualifying nouns which denote animates, thus:
mašr 'older, senior', masc.pl. *mašrā̆n*, fem.pl. *mašrā̆ne*, obl.pl. *mašrā̆no*.

Examples:

učat	*gaḍ*	*ʃoṛ*	*nāčal*	*tund*

(V.d) Adjectives in *-ǰan, -man, -war,* and ordinals in *-am,* which modify the last stem vowel to *ə́*:[1]

Dir.	غمجن	*yamǰán*	غمجن	*yamǰə́n*	sad
Obl.	غمجن	*yamǰə́n*	غمجنو	*yamǰə́no*	
Prep./Voc.	غمجنه	*yamǰán-a*	"	"	

[1] The feminines of adjectives of this type follow the First declension, their penultimate vowel being stressed *ə́* , e.g. *yamǰə́na, dwayə́ma.*

Dir.	دویم	*dwayám*	دویم	*dwayám*	second
Obl.	"	*dwayəm*	دویمو	*dwayəmo*	
Prep./Voc.	دویمه	*dwayám-a*	"	"	

Sixth Declension: Adjectives ending in the simple vowels, *-a, -ā, -e, -i, -o, -u* are inflexible, except for the rare appearances of the Pl. Obl. in *-o*.

Comparison of Adjectives.

There are no distinctive comparative or superlative forms of adjectives. Comparison is expressed by the normal, positive form of the adjective in conjunction with the prepositions *la (... na), da ... na, da ... šəxa* 'from, than' or *tar* 'over, than'.

دا کتاب له هغه نه لوی دی *dā kitāb la haɣa na loy day.* This book is big(ger) than that one.

تور قلم تر شنهٔ قلم اوږد دی *tor qalam tar šnə qalam uǧd day.* The black pen is long(er) than the blue one.

The superlative is expressed by the phrase 'than all', thus:

دا اس د ټولو نه ښهٔ دی *dā as da ṭolo na x̄ə day.* This horse is (the) best (literally, 'good from all').

Ordinals: The ordinals (above 'first') are conjugated as Fifth declension adjectives (V.d) in *-am* modifying to *-əm*.

1st	وړمبے	*wṛumbáy*			
	لومړی	*lumṛáy*	6th	شپږم	*špaǧám*
2nd	دویم	*dwayám*	7th	اووم	*owám*

4th	څلورم	*čalorám*	9th	نهم	*nəhám*
5th	پنځم	*pinžám*	10th	لسم	*lasám*

In compound numbers only the last element takes the ordinal ending, e.g. *atyā-lasám* '90th', *səl-špagwištám* '126th'.

For 'first' the Arabic اول *awál* is also occasionally used.

IV. Demonstratives

(A) Demonstrative Adjectives:

There are two related demonstrative adjectives, remote: هغه *háya* 'that,' and proximate: دغه *dáya* 'this,' inflexible in the direct case:

	Masc.		Fem.	
Dir.	هغه	هغه	هغه	هغه
	háya	*háya*	*háya*	*háya*
Obl.	هغهٔ	هغو	هغې	هغو
	hayə́	*háyo*	*hayé*	*háyo*

A shift of stress to the final syllable throughout gives emphatic forms, used either anaphorically or contrastively: هغه *hayá* 'that (same)', and دغه *dayá* 'this (same)':

Dir.	هغه	هغه	هغه	هغه
	hayá	*hayá*	*hayá*	*hayá*
Obl.	هغهٔ	هغو	هغه هغې	هغو
	hayə́	*hayó*	*hayé*	*hayó*

In addition there is a short, proximate demonstrative adjective, دا *dā* 'this, these (masc. or fem.),' which inflects only for case, oblique دې *de*, but not for gender or number.

(B) Demonstrative Pronouns

The demonstrative adjective stems هغه *háya* and دغه *dáya*, and their emphatic forms, also function as Demonstrative Pronouns and as Personal Pronouns of the third person. They may then take different forms in the Plural.

a) هغه *háya* 'that, it, he, she':

Masc. Fem.

Dir.	هغه	هغوی ، هغه	هغه	هغوی ، هغه
	háya	*háya, hayúy*	*háya*	*háya, hayúy*
Obl.	هغهٔ	هغو ، هغوی	هغې	هغو ، هغوی
	hayə́	*háyo, hayúy*	*hayé*	*háyo hayúy*

b) دغه *dayá* 'this (same), it, he she':

Dir.	دغه	دغوی ، دغه	دغه	دغوی ، دغه
	dayá	*dayá, dayúy*	*dayá*	*dayá, dayúy*
Obl.	دغهٔ	دغو ، دغوی	دغې	دغو ، دغوی
	dayə́	*dayó, dayúy*	*dayé*	*dayó, dayúy*

Some dialects in Afghanistan have an additional more remote pronoun, هوغه *hóya* 'that (further away)' which follows the same pattern; Pakistani dialects have a similar pronoun هاغه *hăya*.

c) The short demonstrative adjective دا *dā*, oblique دې *de*, also serves as a pronoun 'this (one), he, she, it (here)'. When emphasized, anaphorically or contrastively, a more inflected form takes its place, 'this (same), he, she (here)':

Dir	دی[α] ، دے[ɲ]	دوی	دا	دوی
	day	*duy*	*dā*	*duy*
Obl.	ده	دیو ، دوی	دې	دیو ، دوی
	də	*duy, dío*	*de*	*duy, dío*

V. Personal Pronouns

(A) Distinct Personal Pronouns occur only in the first and second persons. They are inflected for number, but not for gender. They differ from other nominal forms in the following details:

1) The Oblique case is employed for the Direct Object of a transitive verb in the present tenses, e.g.,

تا وینم	*tā winəm*	I see you (sing.)

2) Each person has an independent possessive form, functioning either as a simple possessive, e.g.,

زما کور	*zmā kor*	my home

or governed by certain pre- and postpositions, e.g.,

ستا د پاره	*stā da pāra*	for you (sing.)

First Person (Masc. and Fem.)

	Singular		Plural	
Dir.	زهٔ	*zə*	مونږ ، موږ[α]	*mu(n)ḡ*
Obl.	ما	*mā*	" "	"
Poss.	زما[ɲ] ، ځما[α]	*z/žmā*	زمونږ[ɲ] ، ځموږ[α]	*z/žmu(n)ḡ*

Second Person (Masc. and Fem.)

Dir.	تهٔ	*tə*	تاسو ، تاسې	*tắso (tắsu), tắse (tắsi)*
Obl.	تا	*tā*	" "	" "
Poss.	ستا	*stā*	ستاسو ، ستاسې	*stắso (stắsu), stắse (stắsi)*

(B) There are two types of pronominal particles. They may be classed as independent and enclitic and differ

in both form and function.

(1) The independent pronominal particles have distinction of person, but not of number or gender:

1st person	را	*rā*
2nd person	در	*dar*
3rd person	ور	*war*

They alternate with the Oblique or Possessive forms of the Personal and Demonstrative pronouns governed by certain postpositions:

را پورې *rā pore*	=	ما پورې *mā pore*		with me
ور ته *war ta*	=	هغه ته *hayə ta*		to him
در سره *dar sara*	=	ستا سره *stā sara*		with you

They are not used with prepositions.

In conjunction with certain verbal forms they indicate the indirect pronominal goal of the verbal action., e.g.,

هغه به زهٔ درکړم *haya ba zə dar-krəm* I shall give that to you

(2) The enclitic pronominal particles are not distinguished for gender, but are for person and (except in the third person) for number.

	Sing.		Pl.		
1st person	مې	*me*	مو		*mo (mu)*
2nd person	دې	*de*	مو	(مه)	*mo (mu, ma)*
3rd person (Sing. and Pl.)	یې *ye*				

The enclitic pronominal particles function as:

i) the direct object of a transitive verb in the present tenses:

زهٔ یې وینم *zə ye winəm* I see him

ii) the agent of a transitive verb in the past tenses:

هغه مې ولید *haya me wəlid* I saw him

iii) a simple possessive pronoun:

کور مې *kor me* my home

with the same meaning as زما کور *zmā kor*.

VI. Interrogatives and Indefinites

The following interrogative adjectives occur:

څهٔ	*šə*	what?
څو	*šo*	how much, many?
کوم ، کم	*kəm, kum*	which?

Only *kəm/kum* is declined (1st declension).

Indefinite adjectives are:

دغسې ، داسې	*dáyase, dā́se*	such (of this kind)
هغسې	*háyase*	such (of that kind)
ډېر	*der*	much, many
هر	*har*	each, every
هیڅ	*heš*	any

(only in conjunction with a negative, thus *heš . . . nə* 'no')

ټول	*ṭol*	all
ځنې	*žə́ne*	some

Some of these adjectives also function directly as pronouns, e.g. *kum, ṭol, žəne*. When so used څهٔ *žə* 'what?' has plural concord:

څهٔ دي	*žə di?*	what is it?

as, of course, does څو *žo*:

څو دي	*žo di?*	how many are there/they?

Further interrogative and indefinite pronouns are:

څوك	*žok*	who? (Sg. and PL)	
with the obl. form چا *čā*			
هیڅوك	*héžok*	anyone	obl. هیچا *héčā*
(only in conjunction with a negative, thus *hežok nə* 'no one')			
څومره ، څونه	*žómra, žóna*	how much, howmany?	
دومره ، دونه	*dómra, dóna*	so much, many, this much, many	
هومره	*hómra*	so much, many, that much, many	
واړه	*wāṛə́*	all	

Other interrogatives and indefinites may be expressed by combinations such as

کوم یو	*kum yaw*	which (one)?
هر څوك	*har žok*	everyone, anyone
هر یو	*har yaw*	each (one), everyone
یو څوك	*yaw žok*	someone

I. Verbs

Every verb has a system of tenses in which time (Present, Future, Past and Perfect), mood (Indicative, Subjunctive, Conditional, Imperative, Optative and Potential), and aspect (Imperfective and Perfective) are represented.

Verb Components

Stems: Underlying this system are four stems, Imperfective Present and Past, and Perfective Present and Past. The infinitive, which is the headword form for entries in this dictionary, is formed from the Imperfective Past stem by adding *-ól* (stressed). Verbs may be divided into five conjugations (classes), according to the relation of their infinitive to their other stems. The stems combine with the appropriate endings to form the simple tenses.

Endings: All finite verbal forms except the Optative distinguish person (first, second and third) and number (singular and plural) by their endings. Third persons further show a distinction of gender (masc. and fem.) in past tenses. The verbal endings are:

	Present	Imperative	Past	Optative
Sg. 1.	*-əm(a)*		*-əm(a)*	*-ə̃y*
2.	*-e*	*-a*	*-e*	"
3. M.	*-i*		*-ə (-əy, -Ø, -ᵒⁿ)*	"
F.	*-i*		*-a*	"
Pl. 1.	*-u*		*-u*	"
2.	*-əy, -ās*[1]	*-əy, -ās*[1]	*-əy, -ās*[1]	"
3. M.	*-i*		*-Ø (-ə)*	"
F.	*-i*		*-e*	"

Auxiliaries: (a) The defective verb 'be' is used both alone and as an auxiliary. It has no infinitive form. Of the following inflections, all but the Present I and the Imperative II may take the modifying particle *ba*.

	Present I	II	Imperative II	Past	Optative
Sg. 1.	یم	یم		وم	وای ᵅ وی ⁿ
	yəm	*yəm*		*wəm*	*wə̃y*
Sg. 2.	یې	یې	وه	وې	"
	ye	*ye*	*wa*	*we*	"
Sg. 3. M.	دی ᵅ دے ⁿ	وي		وو ⁿ ، ۆ ⁿ ، و ᵅ ، ۋ ᵅ	"
	day	*wi*		*wə, wu*	"
F.	ده	وي		وه	"
	da	*wi*		*wa*	"
Pl. 1.	یو	یو		وو	"
	yu	*yu*		*wu*	"
2.	یاست ، یئ	یاست ، یئ	وئ	واست ، وئ	"
	yəy, yās[1]	*yəy, yās*[1]	*wəy*	*wəy, wās*[1]	"
Pl. 3. M.	دي	وي		وو	"
	di	*wi*		*wu*	"
F.	دي	وي		وې	"
	di	*wi*		*we*	"

[1] In southern dialects.

(b) The potential auxiliary 'be able' is identical with the perfective forms of *kedəl* 'become'; all forms may take the modifying particle *ba*.

	Present	Imperative	Past	Optative
Sg. 1.	شم		شوم	شوای ، شوی[n]
	šəm		*šwəm*	*šwǎy*
2.	شې		شوې	"
	še	*ša*	*šwe*	"
3. M.	شي		شو	"
	ši		*šu, šo*[n]	"
F.	شي		شوه	"
	ši		*šwa*	"
Pl. 1.	شو		شوو	"
	šu		*šwu*	"
2.	شئ	شئ	شوئ	"
	šəy	*šəy*	*šwəy*	"
3. M.	شي		شول	"
	ši		*šwəl*	"
F.	شي		شوې	"
	ši		*šwe*	"

Separable Prefixes: The prefix *wə́-*,[1] and those used in verbs of the 3rd Conjugation below, are called separable because particles such as:

(i) the tense modifiers (*ba, de*),

(ii) the pronominal modifiers (*me, de, ye, mu*), and

(iii) negatives (*nə, ma*)

may appear (in that order) between the stressed prefix and the verb. Thus from *prekawə́l* 'to cut':

pré ba ye nə́ krəm 'I shall not cut it', but *nə́ ba ye pre-kawə́m* 'I shall not be cutting it'.

Note: When there is no separable prefix and no verbal prefix *wə-*, the above particles will follow the verb unless there is a preceding word. Thus, in the paradigms below, a form such as the Future I will occur as *rasegəm ba* only if there are no other words in the clause; however, if the clause includes any other words, the particle *ba* will shift to follow the first word of the clause: *zə ba rasegəm* 'I shall arrive' or *sabā ba (zə) rasegəm* 'Tomorrow I shall arrive.' Compare also *largay ba pré nə́ krəm* 'I shall not cut wood', but *largay ba nə́ pre-kawə́m* 'I shall not be cutting wood'.

[1] Prior to the Bara Gali conference in July, 1990, a common Pakistani spelling of this prefix was او, reflecting the Yusufzai pronunciation *u-* or (less often) *o-*. The Afghan form is sometimes pronounced as *wu-*, rather than standard *wə-*.

Tenses and Conjugations

Simple Tenses: The system of simple tenses for the Imperfective (I) and the Perfective (II), with and without the modifying particle *ba*, is summarized below:

Simple forms		Simple forms with the modifier به *ba*	
I (Imperfective)	II (Perfective)	I (Imperfective)	II (Perfective)
Present stems:			
Present I (Indicative)	Present II (Subjunctive)	Future I	Future II
Imperative I	Imperative II	—	—
Past stems:			
Past I (Imperfect)	Past II (Preterite)	Past Habitual/ Conditional I	II
Optative I	Optative II	Optative III	

Compound Tenses: From either Past stem (according to the Conjugation) a Perfect participle is formed by the addition of *-ə́lay*. In conjunction with the various tense forms of the auxiliary verb 'be,' this participle forms compound tenses:

Perfect I (Indicative)	Perfect II (Subjunctive)	—	Future Perfect
Pluperfect	—	Perfect Conditional	—
Perfect Optative I	—	Perfect Optative III	—

The simple Optative forms I and, rarely, II combine with the simple tense forms of the auxiliary verb 'be able', to produce the Potential forms:

Potential Present	—	Potential Future	—
Potential Past	—	Potential Past Habitual	—
Potential Optative	—	—	

Conjugations

First Conjugation: Regular verbs. The forms of the Past and Present Imperfective (I) stems are predictable from one another and the corresponding Perfective (II) stems are formed by the addition of the separable prefix *wə́-* (*wú-*, *ú-*):[1]

(a) Transitive verbs (including all simple verbs with infinitive in *-awə́l*) which form the present stem by dropping the *-ə́l* of the infinitive and past stem:

Present I	II	Past I	II	
taṛ-	*wə́taṛ-*	*taṛə́l-*	*wə́taṛə́l*	'to tie'

The *-ə́l* of the past stem may also be dropped in the 3rd Sg. M. (e.g. from ساتل 'to keep', Past I, 3rd Sg. F. ساتله *sātə́la* but 3rd Sg. M. ساتهٔ *sātə́* 'kept'). When the root vowel preceding the *-ə́l-* of the past stem is *-ā-*, this was originally lengthened in the 3rd Sg. M. of the past tenses; thus from تړل 'to tie':

Past I, 3 Sg. F. تړله *taṛə́la* but 3rd Sg. M. تاړهٔ *tāṛə́* 'tied',

Past II, 3 Sg. F. واچوله *wā́čawəla* but 3 Sg. M. واچاوهٔ *wā́čāwə* 'threw.'

These older forms are still used in Afghanistan, but in Pakistan regularized forms like 3 Sg. M. تړلو *taṛə́lo*, واچولو *wāčawə́lo* are common. In Afghanistan *laṛə́l* لرل 'to have' has the irregular Past I stem *darlod(ə́l)-* درلود , against Pakistan *laṛə́l-* لرلـ 'had'.

(b) Intransitive verbs with infinitive and past stem in *-edə́l* and a present stem in *-ég̃-*, such as *rasedə́l* 'to arrive':

raseg̃-	*wə́raseg̃-*	*rased(ə́l)-*	*wə́rased(ə́l)-*

[1] The perfective prefix combines with an initial *a-* or *ā-* to give *wā́-*; thus *ā̆xistə́l* 'to take' gives *wā́xist-*, *wā́xl-*.

The *-əl-* marking the past appears regularly in the 3rd person forms, except in the 3 Sg. M. where it may be omitted; in the 1st and 2nd persons *-əl-* is optional.

A few verbs in *-edəl* have an alternate short present stem without *-eg̃-*; thus *osedəl, oseg̃-* 'to dwell' has the alternate *os-*, giving *oségəm* or *ósəm* in the 1st person. (The few verbs ending in *-edəl* and having only a shorter present stem belong in the 2nd Conjugation.)

Second Conjugation: Irregular verbs. The Past and Present I stems are not immediately predictable from one another; however, the Perfective (II) stems are formed directly from the corresponding I stems by adding the prefix *wə́-*. The Past I stem is identical with the infinitive, except that the ending *-ə́l* may be omitted in the 3rd Sg. M., and is optional in the 1st and 2nd persons. The present stem generally originates from the same root as the past, so that they share at least initial consonants, as:

Present I	II	Past I	Past II	
xéž-	*wə́xež-*	*xat(ə́l)-*	*wə́xat(əl)-*	'to rise'

In the case of defective verbs, however, they may be completely unrelated, e.g.:

win-	*wə́win-*	*lid(ə́l)-*	*wə́lid(əl)-*	'to see'
gór-	*wə́gor-*	*kat(ə́l)-*	*wə́kat(əl)-*	'to look'

When the root vowel preceding the *-ə́l-* of the past stem is *-a-*, this was originally either lengthened in the 3rd Sg. M. of the past tenses, thus from وژل 'to kill':

Past I, 3 Sg. F. وژله *važə́la* but 3rd Sg. M. واژه *wāžə́* 'killed',

or changed to *-o-*, e.g.:

Past I, 3 Sg. F. خټله *xaṭəla* but 3 Sg. M. خوت *xoṭ* 'rose'.

These older forms are still used in Afghanistan, but in Pakistan regularized forms like 3 Sg. M. وژلو *važə́lo*, خټلو ، خټو *xaṭ(ə́l)o* are common.

Third Conjugation: Derivative verbs. These are formed from a simple verb of the above First or Second Conjugations by the addition of a separable prefix such as *rā, dar, war, žār, kx̄e, nəna, prā, pre, pore, ter.* In the formation of the Past and Present I stems these verbs follow the simple verb. The corresponding II stems are formed by a shift of stress to the prefix, however, instead of by adding the prefix *wə́-*. For the verb *prewaṭə́l*:

Present I	II	Past I	Past II	
prewə́ž-	*pré-wəž-*	*prewaṭ(ə́l)-*	*pré-waṭ(əl)-*	'to fall'

Fourth Conjugation: Double verbs. These verbs, few in number, have Present and Past II stems that are irregular and in no way predictable from the corresponding I stems. Of them, only *kedə́l* and *kawə́l* take the prefix *wə́-* in the II stems, and then only when used as independent (not auxiliary) verbs.

(a) Transitive:

kawə́l کول 'do'; Past participle: *kəṛay* کړی$^{\alpha}$ ، کړے$^{\pi}$:

kaw-´	*(wə́)k(ṛ)-*	*kaw(ə́l)-*	*(wə́)kṛ(əl)-*

wṛəl وړل 'take away'; Past participle: *wə́ṛay* وړی$^{\alpha}$ ، وړے$^{\pi}$

wṛ-´	*yós-*	*wṛ(ə́l)-*	*yówṛ(əl)-*

biwə́l بیول 'lead away'; Past participle: *biwə́lay* بیولی$^{\alpha}$ ، بیولے$^{\pi}$

byə̄y-	*bóz-*	*biw(ə́l)-*	*bót(l)(əl)-*

ix̄odəl ایښودل 'put'; Past participle: *íx̄ay* ایښی$^{\alpha}$ ، ایښے$^{\pi}$

(i)g̃d-´	*kx̄ég̃d-*	*ix̄od(ə́l)-*	*kx̄ex̄od(ə́l)-*
(but also, as 3rd conjugation)		*kx̄éx̄od(əl)-*	

(b) Intransitive:

kedəl کېدل 'become'; Past participle: *šówa*y شوی$^{\alpha}$ ، شوے$^{\pi}$

kég-	*(wə́)š-*	*ked(ə́l)-*	*(wə́)šw(əl)-*

tlal تلل 'go' Past participle: *t(l)ólay* تللی$^{\alpha}$ ، تلے$^{\pi}$

ž-	*(w)xắṛ ǯ-*	*t(l)X́l)-*	*(w)xắṛ(ə)l)-*

rātlal راتلل 'to come'; Past participle: *rāγólay* راغلی$^{\alpha}$ ، راغلے$^{\pi}$

rāž-´	*rắš-*	*rāt(l)X́l)-*	*rắγ(l)X́l)-*

Similarly *dartlal* درتلل 'come to you', *wartlal* ورتلل *wartlal* 'come to him, it'.

Fifth Conjugation: Denominatives. These verbs are made from a noun or an adjective.

(a) The intransitive verbs have a Past I stem consisting of the nominal stem plus *-ed(ə́l)-* like their infinitives. The Present I stem is the regular nominal stem plus *-égˇ-*, the corresponding II stems are the independent nominal form plus the II forms of *kedə́l*. Thus *joṛedə́l* جوړېدل 'be made':

joṛégˇ- jóṛ šˇ- joṛed(ə́l)- jóṛ šw(ə)-

(b) The transitive verbs have a Past I stem consisting of the nominal stem plus *-aw(ə́l)-*, corresponding to the infinitive in *-awə́l*. The Present I stem is then regularly the nominal stem plus *-aw-´*, as in the First conjugation. The corresponding II stems are provided by the independent nominal form with the II forms of the verb *kawə́l* as an auxiliary, as *joṛawə́l* جوړول 'make':

joṛaw-´ jóṛ k(ṛ)- joṛaw(ə́l)- jóṛ kṛ(ə)-

When the adjective forming a denominative verb is of the Fourth declension, the stem used in the Imperfective forms (present and past) is the 'weak' (Feminine) form, as: *paxawə́l* پخول 'cook':

paxaw-´ póx k(ṛ)- paxaw(ə́l)- póx kṛ(ə)-

Nouns forming denominative verbs take the appropriate adjectival endings in the Perfective II (past and present) tenses when they appear independently of the auxiliary verb:

بڼځې را(ته) یادې شولې *Xəže rā (ta) yāde šw(ə)e*

I remembered the women (fem. pl.).

Note: Complex verbs formed from a noun or adjective plus a verb such as *kedə́l, kawə́l, larə́l*, or *wahə́l*, differ from denominative verbs in that both nominal and verbal forms are independent throughout. Thus, with *mina kawə́l* مینه کول 'love':

mina kaw-´ mina wə́k(ṛ)- mina kaw(ə́l)- mina wə́kṛ(ə)

VII: Relative Clauses

Pashto has no relative pronoun. Relative clauses are introduced by the inflexible particle چې[α], چه[π] *č e* 'that.' When the relative pronoun is the subject or the direct object of its clause, no pronoun need be expressed:

Subject:

[α]یو سړی و چې بازار ته ولاړ .
yaw saṛay wə če bāzār ta wlāṛ.
[π]یو سړے وو چه بازار ته لاړ شو .
yaw saṛay wo če bāzār ta lāṛ šo.
There was a man who went to the market.

[α](هغه) سړی چې کور ته راځي زوړ دی .
[π] (هغه) سړے چه کور ته راځي زوړ دے .[1]
(haya) saṛay če kor ta rāži zoṛ day.
The man who comes to the house is old.

Object:

[α]هلك چې زهٔ وینم خفه دی .
[π]هلك چه زهٔ وینم خفه دے .
halək če zə winəm xafa day.
The boy whom I see is sad.

although it may be expressed by a pronoun when the relative is the object of its clause:

[α]دا یو ښهٔ کار دی چې ته یې کوې .
dā yaw x̄ə kār day če tə ye kawe.
[π]ته چه یې کوې دا یو ښهٔ کار دے .
tə če ye kawe dā yaw x̄ə kār day.
This is a good deed that you are doing.

particularly when the antecedent is a 1st or 2nd person pronoun having an oblique form for the object,

[α]زهٔ چې تهٔ مې دلته وینې په سپین کور کښې اوسېږم .
[π]زهٔ چه تهٔ مې دلته وینې په سپین کور کښې وسېږم .
zə če tə me dalta wine pa spin kor kx̄e osēg̃əm.
I whom you see here live in the white house.

However, when the relative pronoun has any oblique sense within its clause, i.e., when it is governed by a preposition or is the agent, it must be resumed within the clause by a personal or demonstrative pronoun; thus with prepositions:

[α]کتاب تر هغه میز د لاندې ولوېد چې ما ور باندې لیکل .
[α]*kitāb tar haya mez da lānde wə-lwed če mā war bānde likəl.*
[π]کتاب د هغه میز د لاندې پرېوتو چه ما ور باندې لیکل .
[π]*kitāb da haya mez da lānde prewato če mā war bānde likəl.*
The book fell under the table on which I was writing.

[α]هغه سړی چې زه ور سره ناست یم عالم دی .
haya saṛay če zə war sara nāst yəm ʿālim day.
[π]زهٔ چه ور سره ناست یم هغه سړے عالم دے .
zə če war sara nāst yəm haya saṛay ʿālim day.
The man with whom I am sitting is learned.

or acting as a dependent (possessive) pronoun:

[α]هغه شپون مې ولید چې بد حال یې و .

---

[1] An alternate word order is کور ته چه راځي هغه سړے زوړ دے .

[α]*haya špun me wəlid če bad hāl ye wə.*
[1]. [π]هغه شپونکے مے اولیدو چه بد حال یې وو
[π]*haya špunkay me ulido če bad hāl ye wo.*
I saw the shepherd, who was in a bad way.

or as the agent:

[α]یو سړی و چې دېر کتابونه یې لیکلي و .
yaw saṛay wə če ḍer kitābuna ye likəli wə.
[π]یو سړے وو چه دېر کتابونه یې لیکلي وو .
yaw saṛay wo če ḍer kitābuna ye likəli wo.
There was a man who had written many books.

[π]یو سوداګر و چې د سفر نیت یې وکړ .
[α]*yaw sawdāgar wə če da safar niyat ye wəkaṛ.*
[π]یو سوداګر وو چه د سفر نیت یې وکړو .
[π]*yaw sawdāgar wo če da safar niyat ye wəkṛo.*
There was a merchant who decided to make a journey.

Note I: The pronoun may be inherent in an 'absolute' preposition such as:

pre پرې *pe* پې = *pa hayə (bānde)* (باندې) په هغهٔ
tre ترې = *da hayə na* د هغهٔ نه ،
pakše پکښې = *pa hayə kše* په هغه کښې

For example: [α]هغه کور چې زه پکښې اوسم
[π]هغه کور چه زهٔ پکښې اوسم
haya kor če zə pakše osəm
The house in which I live

Note II: The object of an English relative clause may be the subject of the Pashto clause, and so not resumed by a pronoun, as:

[α]سخت کار و چې هغو وکړ .
saxt kār wə če hayo wə kaṛ.
[α]سخت کار و چه هغو وکړو .
saxt kār wə če hayo wə kṛo.
It was a difficult job which they did.

---

[1] Or چه به حال یې وو هغه شپونکے مې اولیدو

Other abbreviations used in the dictionary samples can be found in Part III of this report. The abbreviations, Bot.: and Zoo.: for botanical and zoological names respectively, will need added information or verification from Peshawar University faculty or similar regional experts in the final draft. Notations of F2 sources are preliminary; considerable work still needs to be done to integrate vocabulary from the quite diverse F2 sources into the generally more common vocabulary of the F1 source texts.

It might here be mentionned that the following sample letter was selected because it is the first letter in the Pashto alphabet which does not also occur in the Arabic alphabet. This thus eliminates a large category of borrowed words; however, many borrowings from Urdu and Persian will be found.

Frequency List II

The left-hand column of Frequency List II is the observation number; this observation number is supplied by the Statistical Analysis Systems (SAS) program and is simply a number beginning with one in each section and increasing by one with each new word form. It is followed by the text word transcribed according to the Table on the following page. The text words are in the alphabetic order used by the SAS program: & $ ¬ / % ? ' # @ ' b c d e f g h i j k l m n o p q r s t u v w x y z [A B C D E F G H I J K L M N O P Q R S T U V W X Y Z 0 1 2 3 4 5 6 7 8 9, rather than that of the Pashto alphabet on the following page. The eight numeric columns from left to right represent the following categories of frequencies and the total frequencies for the volume as a whole:

Text Category	Frequency
TF1: Total of the following seven columns.	414,418
C1: Ghazals of Khushhal Khan Khattak coded PX.	112,876
C2: Poetry of Rahman Baba coded RB.	58,620
C3: Poetry of Hamid Baba coded HB.	41,374
C4: Poetry of Ali Khan coded ALIX.	29,042
C5: Southern dialect texts coded ULA(S) and ABS.	99,475
C6: Folk texts coded F (see also Frequency List I).	65,475
C7: Pakistani literary texts coded PM (or PMM in joined files).	7,556

The left-hand columns have text references enclosed by < and >. Bibliographic details for the reference codes are given in the Final Report's Project Description and Samples: Part II: Code List for the Frequency Volumes; the word counts on the Code List are calculated by WordPerfect, which defines a word somewhat differently than SAS. Part II of the Final Report also includes a description of the Method of Compilation; an explanation of certain kinds of error is given in Part II: Annotation of a Frequency List.

In Frequency List II, the symbol | represents the end of the first hemistich of a couplet and || represents the end of the second hemistich; the symbol has sometimes become attached to a word, causing it to be listed as a separate entry. Also, in the process of transforming the PX transcription system to that of this project, the letter ط may sometimes have been transformed as \ rather than /. The result will be that a word such as وطن, which would usually be transcribed as w\n, may appear as w/n in these frequency lists. The + and [in Frequency List II are notations for text or tape variations in the original typing; the project director can provide a list of notes if needed.

Table of ASCII Characters

The following table represents the ASCII characters used for typing the Pashto texts included in the Frequency Tables. The same characters were also used to type the original dictionary in WordPerfect; the computer key, *b*, was typed to represent the Pashto letter ب, which sounds like *b* in English. The Frequency Tables were laser-printed from the University of Pennsylvania's mainframe computer. The Pashto letter ژ, which was typed as ^ (found above the number 6 on many computer keyboards) is printed as ¬ on the mainframe's laser printer used for Frequency List I and II.
